This book contains 11 papers from the 8th Workshop on Global Sourcing, held in Val d'Isère, France, during March 23–26, 2014, which were carefully reviewed and selected from 42 submissions.

They are based on a vast empirical base brought together by leading researchers in information systems, strategic management, and operations. This volume is intended for students, academics, and practitioners interested in research results and experiences in outsourcing and offshoring of information technology and business processes. Topics discussed in this book combine theoretical and practical insights regarding challenges that industry leaders, policy makers, and professionals face; and they predominantly focus on how sourcing relationships are governed at the national, industry, and firm level. The contributions also examine current and future trends in outsourcing, paying particular attention to cloud services and their impact on the outsourcing sector.
