Our universe is a vast and fascinating place. This volume takes readers on a sweeping tour, covering both our solar system and the vast reaches of space beyond it. Galaxies, quasars, white dwarfs, dark matter, supernovas, and more are introduced. The book delves into the histories of astronomy and space exploration. It even covers the universes history, starting with the big bang and discussing how scientists think it all might end. Charts, diagrams, drawings, and incredible photographs illustrate an array of incredibly distant objects. This book will satisfy space enthusiasts and might even captivate those who were not previously interested.
