Java Methods: Object-Oriented Programming and Data Structures

Maria Litvin, Gary Litvin

Java Methods: Object-Oriented Programming and Data Structures Maria Litvin, Gary Litvin
This book offers a thorough introduction to the concepts and practices of object-oriented programming in Java. It also introduces the most common data structures and related algorithms and their implementations in the Java collections framework.

Chapters 1-14 follow the syllabus of the AP Computer Science course. They will prepare you well for the AP CS exam. Chapters 15-18 on file input and output, graphics, graphical user interfaces, and events handling in Java will give you a better sense of real-world Java programming; this material also makes case studies, labs, and exercises more fun. Chapters 19-26 deal with more advanced data structures and algorithms. The last chapter, Design Patterns, discusses more intricate aspects of object-oriented design and serves as an introduction to design patterns.

The book follows four main threads: OOP concepts and techniques, algorithms, Java syntax and style, and Java libraries. As in the software engineering profession itself, these threads are interwoven into an inseparable braid.

Working through this book will not make you a Java expert right away, but it will bring you to the level of an entry-level Java programmer with a better than average understanding of the fundamental concepts.

From reader reviews:

Jack Cluck:

This Java Methods: Object-Oriented Programming and Data Structures book is simply not ordinary book, you have after that it the world is in your hands. The benefit you have by reading this book is actually information inside this guide incredible fresh, you will get data which is getting deeper you actually read a lot of information you will get. This particular Java Methods: Object-Oriented Programming and Data Structures without we recognize teach the one who examining it become critical in thinking and analyzing. Don't always be worry Java Methods: Object-Oriented Programming and Data Structures can bring any time you are and not make your bag space or bookshelves' grow to be full because you can have it inside your lovely laptop even cellphone. This Java Methods: Object-Oriented Programming and Data Structures having excellent arrangement in word in addition to layout, so you will not truly feel uninterested in reading.

Susan Arnold:

Reading can called imagination hangout, why? Because when you find yourself reading a book mainly book entitled Java Methods: Object-Oriented Programming and Data Structures your brain will drift away trough every dimension, wandering in most aspect that maybe mysterious for but surely might be your mind friends. Imaging each word written in a reserve then become one type conclusion and explanation which maybe you never get prior to. The Java Methods: Object-Oriented Programming and Data Structures giving you another experience more than blown away the mind but also giving you useful information for your better life within this era. So now let us demonstrate the relaxing pattern the following is your body and mind is going to be pleased when you are finished examining it, like winning a casino game. Do you want to try this extraordinary wasting spare time activity?

Ronald Smith:

Your reading sixth sense will not betray you actually, why because this Java Methods: Object-Oriented Programming and Data Structures reserve written by well-known writer who knows well how to make book that can be understand by anyone who read the book. Written with good manner for you, dripping every ideas and publishing skill only for eliminate your own personal hunger then you still uncertainty Java Methods: Object-Oriented Programming and Data Structures as good book not simply by the cover but also through the content. This is one publication that can break don't assess book by its cover, so do you still needing another sixth sense to pick this specific!? Oh come on your reading sixth sense already said so why you have to listening to another sixth sense.

Stuart Rosado:

That reserve can make you to feel relax. This kind of book Java Methods: Object-Oriented Programming and Data Structures was colorful and of course has pictures on the website. As we know that book Java Methods: Object-Oriented Programming and Data Structures has many kinds or category. Start from kids until

adolescents. For example Naruto or Investigation company Conan you can read and think you are the character on there. Therefore , not at all of book are generally make you bored, any it makes you feel happy, fun and unwind. Try to choose the best book for you and try to like reading that will.
