This is the “go-to” book for cancer detection tests. It is changing the way the world detects cancer. Americans are led to believe the only way to discover cancer is to wait for a tumor to grow big enough to see it with a mammogram, PSA screening, or PET scan. This is DEAD WRONG. These tests are late diagnostic. By the time a lump or bump is discovered, it has most likely been growing for 7-10 years. This book is the road map for how to detect cancer years before standard tests do. If you are in treatment, this book also tells you how to avoid being subjected to the conventional one-size-fits-all cancer treatment. You can find out what drugs and natural therapies will be effective for your specific cancer and tailor a personal program for you. We can find cancer years before standard tests would detect it. This gives us an opportunity for true, non-toxic interventions years before finding the lump or bump. Tests can also confirm if you are truly cancer free after treatment when you’ve been told your margins are clear and your PET scan is “clean.” The purchase of the 3rd Edition comes with a free Resources Download – a treasure trove of valuable tools you can use to quickly find good information for contacting integrative cancer physicians, understanding how cancer develops, and finding helpful videos and websites.
