Pseudo-reductive Groups (New Mathematical Monographs)

Brian Conrad, Ofer Gabber, Gopal Prasad

Pseudo-reductive Groups (New Mathematical Monographs) Brian Conrad, Ofer Gabber, Gopal Prasad
Pseudo-reductive groups arise naturally in the study of general smooth linear algebraic groups over non-perfect fields and have many important applications. This monograph provides a comprehensive treatment of the theory of pseudo-reductive groups and gives their classification in a usable form. In this second edition there is new material on relative root systems and Tits systems for general smooth affine groups, including the extension to quasi-reductive groups of famous simplicity results of Tits in the semisimple case. Chapter 9 has been completely rewritten to describe and classify pseudo-split absolutely pseudo-simple groups with a non-reduced root system over arbitrary fields of characteristic 2 via the useful new notion of 'minimal type' for pseudo-reductive groups. Researchers and graduate students working in related areas, such as algebraic geometry, algebraic group theory, or number theory will value this book, as it develops tools likely to be used in tackling other problems.

From reader reviews:

Fernando Rowe:

The reserve with title Pseudo-reductive Groups (New Mathematical Monographs) has lot of information that you can study it. You can get a lot of gain after read this book. This book exist new expertise the information that exist in this reserve represented the condition of the world currently. That is important to yo7u to find out how the improvement of the world. This particular book will bring you with new era of the globalization. You can read the e-book on the smart phone, so you can read this anywhere you want.

Pearl Norris:

You can obtain this Pseudo-reductive Groups (New Mathematical Monographs) by look at the bookstore or Mall. Only viewing or reviewing it may to be your solve trouble if you get difficulties for ones knowledge. Kinds of this guide are various. Not only by simply written or printed and also can you enjoy this book simply by e-book. In the modern era such as now, you just looking by your local mobile phone and searching what your problem. Right now, choose your own ways to get more information about your publication. It is most important to arrange you to ultimately make your knowledge are still up-date. Let's try to choose right ways for you.

Sophie Clark:

A lot of e-book has printed but it is unique. You can get it by online on social media. You can choose the top book for you, science, witty, novel, or whatever by means of searching from it. It is called of book Pseudo-reductive Groups (New Mathematical Monographs). You can include your knowledge by it. Without making the printed book, it might add your knowledge and make anyone happier to read. It is most important that, you must aware about guide. It can bring you from one destination for a other place.

Richard Moultrie:

Reading a book make you to get more knowledge as a result. You can take knowledge and information originating from a book. Book is written or printed or descriptive from each source this filled update of news. Within this modern era like right now, many ways to get information are available for you. From media social like newspaper, magazines, science book, encyclopedia, reference book, fresh and comic. You can add your knowledge by that book. Ready to spend your spare time to open your book? Or just trying to find the Pseudo-reductive Groups (New Mathematical Monographs) when you required it?
