The Root Causes of Biodiversity Loss Alexander Wood, Pamela Stedman-Edwards, Johanna Mang

The world is losing species and biodiversity at an unprecedented rate. The causes go deep and the losses are driven by a complex array of social, economic, political and biological factors at different levels. Immediate causes such as over-harvesting, pollution and habitat change have been well studied, but the socioeconomic factors driving people to degrade their environment are less well understood. This book examines the underlying causes. It provides analyses of a range of case studies from Brazil, Cameroon, China, Danube River Basin, India, Mexico, Pakistan, Philippines, Tanzania and Vietnam, and integrates them into a new and interdisciplinary framework for understanding what is happening. From these results, the editors are able to derive policy conclusions and recommendations for operational and institutional approaches to address the root causes and reverse the current trends. It makes a contribution to the understanding of all those - from ecologists and conservationists to economists and policy makers - working on one of the major challenges we face.

From reader reviews:

Malissa Conlin:

What do you about book? It is not important with you? Or just adding material if you want something to explain what you problem? How about your free time? Or are you busy man? If you don't have spare time to complete others business, it is gives you the sense of being bored faster. And you have free time? What did you do? Everyone has many questions above. They should answer that question mainly because just their can do which. It said that about book. Book is familiar on every person. Yes, it is proper. Because start from on pre-school until university need that The Root Causes of Biodiversity Loss to read.

Colleen Key:

Reading a publication tends to be new life style within this era globalization. With reading you can get a lot of information which will give you benefit in your life. Along with book everyone in this world can easily share their idea. Books can also inspire a lot of people. Plenty of author can inspire their very own reader with their story or perhaps their experience. Not only the story that share in the guides. But also they write about advantage about something that you need example. How to get the good score toefl, or how to teach your young ones, there are many kinds of book which exist now. The authors these days always try to improve their talent in writing, they also doing some study before they write for their book. One of them is this The Root Causes of Biodiversity Loss.

Mark Hernandez:

Are you kind of active person, only have 10 as well as 15 minute in your day to upgrading your mind proficiency or thinking skill also analytical thinking? Then you are experiencing problem with the book compared to can satisfy your short period of time to read it because this time you only find guide that need more time to be study. The Root Causes of Biodiversity Loss can be your answer mainly because it can be read by an individual who have those short extra time problems.

Billy Anderson:

Beside that The Root Causes of Biodiversity Loss in your phone, it may give you a way to get closer to the new knowledge or info. The information and the knowledge you are going to got here is fresh from the oven so don't always be worry if you feel like an older people live in narrow town. It is good thing to have The Root Causes of Biodiversity Loss because this book offers for you readable information. Do you occasionally have book but you do not get what it's interesting features of. Oh come on, that would not happen if you have this with your hand. The Enjoyable set up here cannot be questionable, like treasuring beautiful island. Techniques you still want to miss that? Find this book in addition to read it from now!
