Universe by Design Danny Faulkner

And God said, Let there be lights in the firmament of the heaven to divide the day from the night; and let them be for signs, and for seasons, and for days, and years: and God saw that it was good.- Gen. 1:14-18

The universe was created with purpose and reason; and modern science with all of its experiments, exploration, and sophistication has never proven otherwise. In fact, as author Dr. Danny Faulkner makes plain, advanced science argues more for a created cosmology than a big bang. Written for the upper-level student through the well-read layman, *Universe by Design* explores the universe, explaining its origins and discussing the historical development of cosmology from a creationist viewpoint.

Includes:

- Recent developments in cosmology
- Explanatory diagrams and illustrations
- Theories and facts on the origin and expansion of the universe
- The contributions of Ptolemy, Galileo, Brahe, Newton, Hubble, Einstein, and other famous scientists to the field
- Thorough discussion and problems with the big bang theory
- Many examples and analogies to help understand concepts of cosmology
- Difficulties and critiques of modern cosmology
- Chapter questions and answers for homeschool study

As an excellent supplement to an upper-level homeschool curriculum or the library of an astronomer - amateur or advanced - this book will inform and enlighten the scientific mind.
