Biomedical Foams for Tissue Engineering Applications (Woodhead Publishing Series in Biomaterials)

Biomedical Foams for Tissue Engineering Applications (Woodhead Publishing Series in Biomaterials)

Biomedical foams are a new class of materials, which are increasingly being used for tissue engineering applications. *Biomedical Foams for Tissue Engineering Applications* provides a comprehensive review of this new class of materials, whose structure can be engineered to meet the requirements of nutrient trafficking and cell and tissue invasion, and to tune the degradation rate and mechanical stability on the specific tissue to be repaired.

Part one explores the fundamentals, properties, and modification of biomedical foams, including the optimal design and manufacture of biomedical foam pore structure for tissue engineering applications, biodegradable biomedical foam scaffolds, tailoring the pore structure of foam scaffolds for nerve regeneration, and tailoring properties of polymeric biomedical foams. Chapters in part two focus on tissue engineering applications of biomedical foams, including the use of bioactive glass foams for tissue engineering applications, bioactive glass and glass-ceramic foam scaffolds for bone tissue restoration, composite biomedical foams for engineering bone tissue, injectable biomedical foams for bone regeneration, polylactic acid (PLA) biomedical foams for tissue engineering, porous hydrogel biomedical foam scaffolds for tissue repair, and titanium biomedical foams for osseointegration.

Biomedical Foams for Tissue Engineering Applications is a technical resource for researchers and developers in the field of biomaterials, and academics and students of biomedical engineering and regenerative medicine.

- Explores the fundamentals, properties, and modification of biomedical foams
- Includes intense focus on tissue engineering applications of biomedical foams
- A technical resource for researchers and developers in the field of biomaterials, and academics and students of biomedical engineering and regenerative medicine

From reader reviews:

David Chambers:

Book will be written, printed, or created for everything. You can recognize everything you want by a book. Book has a different type. As we know that book is important matter to bring us around the world. Close to that you can your reading proficiency was fluently. A e-book Biomedical Foams for Tissue Engineering Applications (Woodhead Publishing Series in Biomaterials) will make you to be smarter. You can feel a lot more confidence if you can know about every thing. But some of you think which open or reading any book make you bored. It isn't make you fun. Why they might be thought like that? Have you searching for best book or ideal book with you?

Joshua Dunleavy:

The book untitled Biomedical Foams for Tissue Engineering Applications (Woodhead Publishing Series in Biomaterials) contain a lot of information on it. The writer explains the girl idea with easy approach. The language is very easy to understand all the people, so do certainly not worry, you can easy to read the item. The book was written by famous author. The author will bring you in the new era of literary works. You can easily read this book because you can please read on your smart phone, or gadget, so you can read the book within anywhere and anytime. If you want to buy the e-book, you can wide open their official web-site as well as order it. Have a nice examine.

Rachel Haley:

It is possible to spend your free time to study this book this book. This Biomedical Foams for Tissue Engineering Applications (Woodhead Publishing Series in Biomaterials) is simple to deliver you can read it in the playground, in the beach, train and also soon. If you did not have got much space to bring the particular printed book, you can buy often the e-book. It is make you much easier to read it. You can save the particular book in your smart phone. Therefore there are a lot of benefits that you will get when one buys this book.

Joyce Hynes:

As we know that book is very important thing to add our know-how for everything. By a publication we can know everything you want. A book is a set of written, printed, illustrated or blank sheet. Every year was exactly added. This publication Biomedical Foams for Tissue Engineering Applications (Woodhead Publishing Series in Biomaterials) was filled in relation to science. Spend your spare time to add your knowledge about your science competence. Some people has several feel when they reading a new book. If you know how big benefit of a book, you can feel enjoy to read a reserve. In the modern era like currently, many ways to get book you wanted.
