Neural-Symbolic Cognitive Reasoning (Cognitive Technologies) Artur S. D'Avila Garcez, Luís C. Lamb, Dov M. Gabbay

Humans are often extraordinary at performing practical reasoning. There are cases where the human computer, slow as it is, is faster than any artificial intelligence system. Are we faster because of the way we perceive knowledge as opposed to the way we represent it?

The authors address this question by presenting neural network models that integrate the two most fundamental phenomena of cognition: our ability to learn from experience, and our ability to reason from what has been learned. This book is the first to offer a self-contained presentation of neural network models for a number of computer science logics, including modal, temporal, and epistemic logics. By using a graphical presentation, it explains neural networks through a sound neural-symbolic integration methodology, and it focuses on the benefits of integrating effective robust learning with expressive reasoning capabilities.

The book will be invaluable reading for academic researchers, graduate students, and senior undergraduates in computer science, artificial intelligence, machine learning, cognitive science and engineering. It will also be of interest to computational logicians, and professional specialists on applications of cognitive, hybrid and artificial intelligence systems.

From reader reviews:

Dominick Carter:

Book is to be different for each grade. Book for children until finally adult are different content. To be sure that book is very important for all of us. The book Neural-Symbolic Cognitive Reasoning (Cognitive Technologies) has been making you to know about other understanding and of course you can take more information. It is very advantages for you. The book Neural-Symbolic Cognitive Reasoning (Cognitive Technologies) is not only giving you far more new information but also to be your friend when you sense bored. You can spend your personal spend time to read your reserve. Try to make relationship together with the book Neural-Symbolic Cognitive Reasoning (Cognitive Technologies). You never truly feel lose out for everything in the event you read some books.

Tom Copper:

This book untitled Neural-Symbolic Cognitive Reasoning (Cognitive Technologies) to be one of several books that best seller in this year, this is because when you read this reserve you can get a lot of benefit upon it. You will easily to buy this specific book in the book retail outlet or you can order it via online. The publisher with this book sells the e-book too. It makes you quicker to read this book, as you can read this book in your Smartphone. So there is no reason to your account to past this e-book from your list.

Scottie Kelly:

The e-book untitled Neural-Symbolic Cognitive Reasoning (Cognitive Technologies) is the e-book that recommended to you to see. You can see the quality of the publication content that will be shown to anyone. The language that writer use to explained their ideas are easily to understand. The author was did a lot of investigation when write the book, hence the information that they share for your requirements is absolutely accurate. You also can get the e-book of Neural-Symbolic Cognitive Reasoning (Cognitive Technologies) from the publisher to make you a lot more enjoy free time.

Martha McKee:

Does one one of the book lovers? If yes, do you ever feeling doubt while you are in the book store? Make an effort to pick one book that you just dont know the inside because don't assess book by its handle may doesn't work here is difficult job because you are afraid that the inside maybe not because fantastic as in the outside appear likes. Maybe you answer may be Neural-Symbolic Cognitive Reasoning (Cognitive Technologies) why because the great cover that make you consider in regards to the content will not disappoint an individual. The inside or content will be fantastic as the outside or maybe cover. Your reading sixth sense will directly guide you to pick up this book.
