Theory of Point Estimation (Springer Texts in Statistics)

E.L. Lehmann, George Casella

Theory of Point Estimation (Springer Texts in Statistics) E.L. Lehmann, George Casella
This second, much enlarged edition by Lehmann and Casella of Lehmann's classic text on point estimation maintains the outlook and general style of the first edition. All of the topics are updated, while an entirely new chapter on Bayesian and hierarchical Bayesian approaches is provided, and there is much new material on simultaneous estimation. Each chapter concludes with a Notes section which contains suggestions for further study. This is a companion volume to the second edition of Lehmann's "Testing Statistical Hypotheses".
