Lanthanide Single Molecule Magnets

Jinkui Tang, Peng Zhang

Lanthanide Single Molecule Magnets Jinkui Tang, Peng Zhang

This book begins by providing basic information on single-molecule magnets (SMMs), covering the magnetism of lanthanide, the characterization and relaxation dynamics of SMMs and advanced means of studying lanthanide SMMs. It then systematically introduces lanthanide SMMs ranging from mononuclear and dinuclear to polynuclear complexes, classifying them and highlighting those SMMs with high barrier and blocking temperatures – an approach that provides some very valuable indicators for the structural features needed to optimize the contribution of an Ising type spin to a molecular magnet. The final chapter presents some of the newest developments in the lanthanide SMM field, such as the design of multifunctional and stimuli-responsive magnetic materials as well as the anchoring and organization of the SMMs on surfaces. In addition, the crystal structure and magnetic data are clearly presented with a wealth of illustrations in each chapter, helping newcomers and experts alike to better grasp ongoing trends and explore new directions.

Jinkui Tang is a professor at Changchun Institute of Applied Chemistry, Chinese Academy of Sciences.

Peng Zhang is currently pursuing his PhD at Changchun Institute of Applied Chemistry, Chinese Academy of Sciences, with a specific focus on the molecular magnetism of lanthanide compounds under the supervision of Prof. Jinkui Tang.

From reader reviews:

Patricia Rhee:

Nowadays reading books become more than want or need but also work as a life style. This reading routine give you lot of advantages. The advantages you got of course the knowledge even the information inside the book that improve your knowledge and information. The data you get based on what kind of guide you read, if you want have more knowledge just go with education and learning books but if you want really feel happy read one together with theme for entertaining including comic or novel. Typically the Lanthanide Single Molecule Magnets is kind of publication which is giving the reader unpredictable experience.

Daryl Glover:

Do you have something that you like such as book? The book lovers usually prefer to choose book like comic, small story and the biggest an example may be novel. Now, why not hoping Lanthanide Single Molecule Magnets that give your satisfaction preference will be satisfied simply by reading this book. Reading addiction all over the world can be said as the method for people to know world much better then how they react when it comes to the world. It can't be mentioned constantly that reading practice only for the geeky man or woman but for all of you who wants to possibly be success person. So , for every you who want to start reading as your good habit, you are able to pick Lanthanide Single Molecule Magnets become your current starter.

James Collins:

This Lanthanide Single Molecule Magnets is great guide for you because the content which is full of information for you who always deal with world and also have to make decision every minute. This particular book reveal it information accurately using great organize word or we can point out no rambling sentences included. So if you are read that hurriedly you can have whole details in it. Doesn't mean it only will give you straight forward sentences but tough core information with splendid delivering sentences. Having Lanthanide Single Molecule Magnets in your hand like keeping the world in your arm, data in it is not ridiculous 1. We can say that no book that offer you world throughout ten or fifteen second right but this book already do that. So , this is certainly good reading book. Hi Mr. and Mrs. stressful do you still doubt in which?

Jason Davis:

Some individuals said that they feel weary when they reading a book. They are directly felt that when they get a half elements of the book. You can choose the book Lanthanide Single Molecule Magnets to make your reading is interesting. Your personal skill of reading talent is developing when you such as reading. Try to choose easy book to make you enjoy to see it and mingle the feeling about book and examining especially. It is to be 1st opinion for you to like to wide open a book and go through it. Beside that the book Lanthanide Single Molecule Magnets can to be your brand-new friend when you're really feel alone and confuse in doing what must you're doing of that time.
