Clinical Assessment and Examination in Orthopaedics C. Rex

"This book is aimed at undergraduate students and orthopaedic trainees and serves its purpose in detailing the techniques of examination of the different regions. The author and the editors of the individual chapters all of whom are experienced surgeons in their specific field have then described specific tests and conditions. Unless the correct diagnosis is made, the advances in orthopaedic surgery will be meaningless. The basis of diagnosis will continue to be the clinical examination as laid down in each chapter of this book". From the foreward by: Charles SB Galasko Professor of Orthopaedic Surgery University of Manchester Past President, British Orthopaedic Association Past Vice President, Royal College of Surgeons of England.
