Porque é que a bissexualidade nos torna humanos (Portuguese Edition) Santiago De La Iglesia Turiño
É uma obra atrevida sobre um tema de candente actualidade: a bissexualidade humana. Este ensaio explora a complexa paisagem da orientação sexual e dá um sentido biológico à homossexualidade humana, enfatizando a escala proposta por Kinsey para redefinir toda a espécie humana como bissexual. O autor, Doutorando em biologia pela Universidade de Barcelona, compara a sexualidade humana com a dos grandes símios, espécies que compartilham connosco mais de 95% do genoma e que são os primatas evolutivamente mais próximos ao ser humano. Os machos dos grandes símios das espécies exclusivamente heterossexuais exibem condutas sociais muito violentas e esta pauta violenta só se vê amortecida nos machos das espécies bissexuais: bonobos e humanos. Nos símios antropomorfos o comportamento sexual e o social estariam estreitamente relacionados
