Sex Markets: The Denied Industry (Routledge IAFFE Advances in Feminist Economics) Marina Della Giusta, Maria Di Tommaso, Steinar Strøm

Empirical and mathematically rigorous, this book provides a study of the economics of prostitution rather than focusing on the sociological and cultural themes. Using economic tools of analysis, internationally based editors have put together a theoretically informed volume that explores the supply and demand of prostitution.

Prostitution is a globalized industry involving millions of workers and it is characterized by a high degree of inequality in working conditions (ranging from slavery to self-managed and legalized unionized employment), by different sub-markets and fully integrated in the productive system.

Taking a provocative approach to prostitution, this book is a must read for students and researchers in the area of gender and economics.
