Artificial Intelligence

David L. Poole, Alan K. Mackworth

Artificial Intelligence David L. Poole, Alan K. Mackworth
Recent decades have witnessed the emergence of artificial intelligence as a serious science and engineering discipline. This textbook, aimed at junior to senior undergraduate students and first-year graduate students, presents artificial intelligence (AI) using a coherent framework to study the design of intelligent computational agents. By showing how basic approaches fit into a multidimensional design space, readers can learn the fundamentals without losing sight of the bigger picture. The book balances theory and experiment, showing how to link them intimately together, and develops the science of AI together with its engineering applications. Although structured as a textbook, the book's straightforward, self-contained style will also appeal to a wide audience of professionals, researchers, and independent learners. AI is a rapidly developing field: this book encapsulates the latest results without being exhaustive and encyclopedic. The text is supported by an online learning environment, AIspace, http://aispace.org, so that students can experiment with the main AI algorithms plus problems, animations, lecture slides, and a knowledge representation system, AIlog, for experimentation and problem solving.

From reader reviews:

Roger Cowen:

Here thing why this particular Artificial Intelligence are different and reliable to be yours. First of all studying a book is good however it depends in the content than it which is the content is as yummy as food or not. Artificial Intelligence giving you information deeper including different ways, you can find any book out there but there is no book that similar with Artificial Intelligence. It gives you thrill reading journey, its open up your own personal eyes about the thing that will happened in the world which is probably can be happened around you. It is easy to bring everywhere like in playground, café, or even in your method home by train. If you are having difficulties in bringing the published book maybe the form of Artificial Intelligence in e-book can be your substitute.

Rebecca Stark:

The ability that you get from Artificial Intelligence is a more deep you rooting the information that hide in the words the more you get serious about reading it. It does not mean that this book is hard to know but Artificial Intelligence giving you buzz feeling of reading. The article writer conveys their point in certain way that can be understood by anyone who read the item because the author of this e-book is well-known enough. That book also makes your current vocabulary increase well. It is therefore easy to understand then can go with you, both in printed or e-book style are available. We propose you for having this particular Artificial Intelligence instantly.

Solange Smith:

As we know that book is essential thing to add our knowledge for everything. By a e-book we can know everything we really wish for. A book is a set of written, printed, illustrated or maybe blank sheet. Every year was exactly added. This book Artificial Intelligence was filled concerning science. Spend your time to add your knowledge about your science competence. Some people has diverse feel when they reading the book. If you know how big advantage of a book, you can experience enjoy to read a e-book. In the modern era like today, many ways to get book that you simply wanted.

Catherine Cote:

As a pupil exactly feel bored to reading. If their teacher inquired them to go to the library or make summary for some publication, they are complained. Just tiny students that has reading's internal or real their passion. They just do what the trainer want, like asked to the library. They go to at this time there but nothing reading critically. Any students feel that looking at is not important, boring and can't see colorful pics on there. Yeah, it is to be complicated. Book is very important for yourself. As we know that on this time, many ways to get whatever we really wish for. Likewise word says, ways to reach Chinese's country. So , this Artificial Intelligence can make you experience more interested to read.
